MACHINE DESIGN

1975 ANNUAL INDEX

Volume 47—January to December

Including 24 regular issues of MACHINE DESIGN plus five special issues—The Materials Reference Issue, Electric Motors & Controls Reference Issue, Mechanical Drives, Bearings & Seals Reference Issue, Fluid Power Reference Issue, Fastening & Joining Reference Issue. Only articles and editorial items one-half page or larger are indexed.

AUTHOR INDEX

Abraham, R. G. & N. Yaroshuk—"Coming—robots that see and feel," July 10, p. 90

Agrawal, G. K.
"Minimum weight springs," June 26, p. 55
"Minimum volume springs," Nov. 13, p. 147

Agrawal, Hari N.—"A Simple Way To Visualize Torsional Stress," Sept. 18, p. 98

Altemeyer, Stanley—"Multi-Part PM," May 15, p. 80

Andersen, Dennis A —"Predicting Was to Plantic Beauting in the stanley of the stanley

Altemeyer, Stanley—"Multi-Part PM," May 15, p. 80
Andersen, Dennis A.—"Predicting Wear in Plastic Bearings," July 10,

p. 85
Anderson, W. D.—"Getting The Most From Cantilever Shafts," Jan. 23, p. 92
"Chicago Simulation." July 10, p. 74

Anderson, W. D.—"Getting The Most From Cantilever Shaits, San. 23, p. 92

Appel, Arthur—"Digital Simulation," July 10, p. 74

Apple, Howard P. and Sherman K. Grinnell—"When Two Bosses Are Better than One," Jan. 9, p. 84

Arkles, Barry and Stephen Gerakaris—"Powder Coatings that Fight Heat and Chemicals," June 12, p. 103

Arkles, Barry, John E. Theberge and Peter Cloud
"Comparing High-Temperature Plastics," Feb. 6, p. 73
"Choosing Plastics for Chemical Resistance," Feb. 20, p. 103
"How Time and Heat Affect Properties of Plastics," Mar. 20, p. 79

Aronson. Robert B.

"How Time and Heat Affect Properties of Plastics," Mar. 20, p. 79 Aronson, Robert B.
"Two New Compacts Join The VW Family," Mar. 6, p. 25
"Preventing A "Towering Inferno," Mar. 20, p. 18
"Fiber Optics: New Developments Bring New Appeal," Apr. 17, p. 81
"Another Try for a New Tank," May 29, p. 20
"Emergency Rescue Equipment," June 12, p. 28
"Outboard Overview," July 24, p. 16
"What's Happening with Electric Vehicles," Oct. 2, p. 20
"No-Meit Welding," Oct. 16, p. 128
"Satellite Solar-Power Stations," Nov. 27, p. 18
"Let the Robot Do It," Nov. 27, p. 54
Atland, George—"Circuits for Controlling Hydraulic Actuator Speed," April 3, p. 152

Babcock, Daniel L.—"Alternative of the MBA," Feb. 20, p. 89
Badawy, M. K.
"Easing The Switch From Engineer To Manager," May 15, p. 66
"Motivating Engineers: A Little Psychology Goes A Long Way,"
Oct. 16, p. 120
Batson, Robert E. and Joseph G. Tokarski—"Keeping Fasteners Tight,"
Sept. 18, p. 86
Baumeister, H. K. and R. A. Sebrosky—"Critical Buckling Loads For
Tapered Columns," Nov. 27, p. 70
Beling, T. E.—"Driving inertial loads with stepper motors," Aug. 7,
p. 85
Bennett, J. T.—"Die Casting Stand-ins for Prototype and Short-Run

p. 50 Bennett, J. T.—"Die Casting Stand-ins for Prototype and Short-Run Parts," July 24, p. 46

Blake, Alexander

"Design of Welded Brackets," Jan. 23, p. 96

"Pressure distorts cylinders where you least expect it," Feb. 6, p. 92

"Coping with Stress Concentration," Nov. 13, p. 128

Blodgett, Omer W.

"How Parts React To Stress," Mar. 6, p. 87

"Refresher course in welding design," Apr. 3, p. 178

"Reeping weldment distortion under control," Oct. 16, p. 146

Booser, E. R.—"When To Grease Bearings," Aug. 21, p. 70

Boulden, Larry L.—"Controlling Aerosols with Oil-less Cylinders,"
Jan. 9, p. 95

Brockman, David E. and Richard W. Nelson—"Hall-Effect Sensors—magnetic switches that have no contacts," Oct. 16, p. 123

Brokaw, A. Paul—"Simpler tuning for wien-bridge oscillators," Sept. 4, p. 78

Bronikowski, Ray J.—"Pareto's law for managers," July 24, p. 65

Brooman, E. W. and J. E. Clifford—"Better batteries for electric vehicles," May 15, p. 89

Brynildsen, R. D.—"Helping The Engineer Plan His Career," Mar. 29, p. 66

Brynildsen, R. D.—"Helping The Engineer Plan His Career," Mar. p. 66
Bryson, Frederick E.
"Garbage Power," Jan. 9, p. 20
"What you should know about Product Recall," Jan. 23, p. 88
"Breaking the Ice Barrier," Feb. 6, p. 20
Buckingham, Ellot K.
"Taking Guesswork out of Worm-Gear Design," Mar. 20, p. 82
"Controlling Tooth Loads in Helical Gears," Oct. 16, p. 142
Byers, Robert C.—"Pushbutton trig," June 12, p. 123

C

Campbell, Thomas and Laurence E. Murch—"Gravity Feed Tracks," June 26, p. 46
Caplan, F.—"Combining decibels," Jan. 23, p. 118
Carswell, Donald D.

Caplan, F.—"Combining decibels," Jan. 23, p. 118
Carswell, Donald D.

"PV ratings for plastic bearings," Jan. 23, p. 116
"Design dimensions for plastic bearings," Feb. 20, p. 121
Chastain, Charles E.—"How much should you trust ASTM test data?"
Jan. 23, p. 107
Christian, John B.—"Supergrease Replaces Oil as a Transmission Lubricant," June 12, p. 117
Clark, T. A.—"High-pressure hydraulics," May 1, p. 89
Cleveland, Dixon—"Controls Are Getting Smarter," Aug. 7, p. 70
Clitford, J. E. and E. W. Brooman—"Better batteries for electric vehicles," May 15, p. 89
Cloud, Peter J.—"The Role of Fillers and Reinforcements in Plastics," Sept. 18, p. 94
Cloud, Peter, John E. Theberge and Barry Arkles
"Comparing High-Temperature Plastics," Feb. 6, p. 73
"Choosing Plastics for Chemical Resistance," Feb. 20 p. 103
"How Time and Heat Affect Properties of Plastics," Mar. 20, p. 79
Coleman, Wells—"Computing Efficiency for Bevel and Hypoid Gears,"
Aug. 21, p. 64 Aug. 21, p. 64

Comella, Thomas M.

"How To Manage Creativity Without Killing It," Mar. 6, p. 68

"Instruments That Think For Themselves," June 26, p. 50

"Elastomers That Conduct Electricity," Aug. 21, p. 60

"Engineering Productivity—Formulating a Pian of Attack," Dec. 11, p. 118

Constance, John D.

"The Road to Registration—The Basic Requirements 1," Sept. 4, p. 54

"The Road to Registration—Passing the Exam 2," Sept. 18 p. 82
"The Road to Registration—Passing the Exam 2," Sept. 18 p. 82
Cornford, A. S.—"Bolt Preload—how can you be sure it's right,"
Mar. 6, p. 78
Courtemanche, Jack—"New Tools for Old Tasks—Computers," Dec.

D

Dann, Richard T.

"How Much Preload for Fasteners?" Aug. 21, p. 66

"High-Torque Hydraulic Motors," Nov. 27, p. 60

Davis, J. Gordon—"Keeping Project Costs in Line," Dec. 11, p. 128

D'Entremont, Robert J.—"Avoiding interference in round parts,"
July 10, p. 88

Dransfield, Peter—"Power Bond Graphs—powerful new tool for hydraulic system design," Oct. 16, p. 134

Dransfield, Peter and Jacek S. Steck!—"Finding—and fixing—hydraulic noise sources," Nov. 13, p. 146

Dreger, Donald R.

"Hot-melt adhesives put it all together." Jan. 9, p. 88

reger. Donald R.

"Hot-melt adhesives put it all together," Jan. 9, p. 88

"Carbon Steels Join the Superplastic Metals," Apr. 3, p. 134

"Large urethane parts, faster, with Reaction-Lipection Molding," Apr. 3, p. 148

"Profile Extrusions from High-Performance Plastics," May 29, p. 42

"Plastic Parts by the Mile," Sept. 4, p. 64

"Injection Molding Moves into Metals," Oct. 2, p. 80

"Injection Molding Moves Than A Minute," Oct. 16, p. 30

"Cutting Costs of Few-of-a-Kind Castings," Nov. 13, p. 140

E

orf, R. K., R. M. Gagosz and J. P. Waters—"Adapting holography to the industrial environment," Feb. 6, p. 92

Fader. Efrom J.—"Balancing Parallel Blowers," Feb. 6, p. 86
Felstein, Milton—"Calculating new positions for rotated axes," June 26, p. 55
Ferner, Charles M.—"Wind-Up Power Sources—more energy in a smaller package," Sept. 4, p. 72
Fessett, Donald J.
"How To Test Gear Transmissions," July 24, p. 60
"Hardware for Testing Gear Transmissions," Aug. 7, p. 80
Field, G. J.—"Seals that Survive Heat," May 1, p. 76
Florio, Sam—"Electronic Ignition," Mar. 6, p. 73
Ford, Frederick—"Control Tricks with Stepping Switches," Apr. 3, p. 138 p. 138
Frostholm, Robert C.—"Miniaturizing with Timers on a Chip," July 10, p. 78 10, p. 78
The New Look in Wiring Hardware," Mar. 20, p. 70

Gagosz, R. M., R. K. Erf and J. P. Waters—"Adapting holography to the industrial environment," Feb. 6, p. 92
Ganapathy, V.—"Finding shear center," July 24, p. 66
Gerakaris, Stephen and Barry Arkles—"Powder Coatings that Fight Heat and Chemicals," June 12, p. 103
Glenn, James W.—"Machines You Can Talk To," May 1, p. 72
Gordon, Keith M.—"Estimating life of multibearing systems," Aug. 21, p. 74
Gove, John—"The Final Connection: Sockets or Solder?" June 26, p. 39
Grinnell, Sherman K. and Howard P. Apple—"When Two Bosses Are Better than One," Jan. 9, p. 84
Groesbeck, William A. and Frank L. Manning—"Flow rates for sharpedged orfices," June 12, p. 123
Gross, T. A. O.—"Safer Power-Tool Braking," May 15, p. 72

Haas, Leonard—''How To Extend Gear Life,'' May 15, p. 76
Hand, E. W.—''How To Save Money When Specifying Sheet Steel,''
July 10, p. 70
Hanley, W. Earl—''Shot Blasting Your Way to Better Finishes,'' Mar.
20, p. 74
Harker, R. J.—''A Simple Way to Use Vibration Equations,'' Feb. 6. p. 79

Harris, W. R. and R. A. Morgan

"Choosing a de-motor drive," Jan. 9, p. 113

"Choosing an ac-motor drive," Mar. 6, p. 92

Haugen, Edward B. and Paul H. Wirsching

"Probabilistic Design—Part 1," Apr. 17, p. 98

"Probabilistic Design—Part 2," May 1, p. 80

"Probabilistic Design—Part 3," May 15, p. 83

"Probabilistic Design—Part 4," May 29, p. 54

"Probabilistic Design—Part 5," June 12, p. 108

Hay, Jay K. and J. W. Martz—"Avoiding Dangerous and Costly Fan Failures," Feb. 20, p. 113

Heumann, Gerhart

"Germany's Electric Scooters," Sept. 4, p. 20

Higgins, Paul T.—"Photogrammetry," July 24, p. 50

Higgins, Paul T.—"Photogrammetry," July 24, p. 50

Hinkel, J. E.—"Hardsurfacing with an arc," Aug. 21, p. 74

Hinkle, Rolland T. and Ivan E. Morse—"Taking Guesswork out of Disc Clutch Design," Nov. 27, p. 64

Holloway, Fred M.—"What Determines Reliability in Metering Pumps?"

Sept. 4, p. 66

Hutten-Czapski, Leon

"Getting More from Spur Gears," Jan. 9, p. 106

"A Bolt That 'Blows' Like a Fuse," May 29, p. 46 Heumann, Gerhart

ı

Irani, R. and A. Morreale—"Stepper Motors Aren't All Alike," June 12, p. 120

Jackson, Theodore A.—"Transactional Analysis," Nov. 27, p. 50
Jacobson, Richard A.—"Mars-Viking: Tougher Than Apollo?" Aug. 7,

(aplan, Joseph—"Variable-Torque Brakes Take Up the Slack in Spooled Materials," Nov. 13, p. 138 cay, David—"TRANSIENT SUPPRESSION—don't make the cure worse than the disease," Feb. 6, p. 82

worse than the disease," Feb. 6, p. 52
Kearney, Avery
"Castings Without Defects," June 26, p. 42
"Castings Without Defects—Part 2," July 10, p. 82
Khol, Ronald—"Fasteners That Fight Fatigue," Feb. 20, p. 98
Koch, James—"Laser Interferometers," Feb. 20, p. 92
Kock, Ronald W.—"Designing springs for infinite life," Oct. 16, p. 148
Kosonocky, W. F.—"CCDs simplify complex electronics," Mar. 20, p. 89
Kulkarni, K. M.—"Lower Cost Titanium Parts," May 1, p. 86

LaPasso, Leonard J.—"Reducing the Risks in New-Product Planning," July 24, p. 42
Lavole, Francis
"Design Show Times," Apr. 3, p. 157
"Here Come the Technologists!" Apr. 17, p. 76
Leek, Jay W.—"Visual Standards: Shortcut to Product Quality," Sept. 4, p. 69
Leibensperger, R. I.—"Look Beyond Catalog Ratings," Apr. 3, p. 142
Leonard, Milton G.
"The Clampdown on Electrical Hazards," Jan. 9, p. 100
"Okay, let's go electronic." May 29, p. 36
"Avoiding Mistakes with Relays," July 24, p. 54
"Electronic Systems as Machine Elements," Aug. 21, p. 54
"Justifying the Shift to Electronics," Oct. 2, p. 82
"Electronic Assembly: In-House or Subcontract?" Nov. 13, p. 122
Lipinski, Thomas—"Tracking Down Elusive Causes for Failure," Apr. 3, p. 130 Japansa. Home and the first power fraction of the large state of the large state.

Japan E. and R. J. Louis—"Balancing flow forces in pneumatic valves." Jan. 9, p. 112

Louis, R. J. and E. Logan—"Balancing flow forces in pneumatic valves," Jan. 9, p. 112

SUBJECT INDEX

Numbers preceding the column heads refer to the Machine Design Subject Classification Systems (rear covers).

Editorial material in this section is classified according to the following system:

The Clampdown on Electrical Hazards Leonard 1/9 100 (6.0)

- 1. Title
- 2. Author's last name (see Author Index for complete name). Departments in regular issues are denoted by the following code:

NTNews/Trends DIDesign International Scan Scanning the Field for New Ideas

3. Date of issue, Machine Design Reference Issues are denoted by the following code:

> EM&C Electric Motors & Controls (Apr. 29) MD Mechanical Drives, Bearings & Seals (June 3) FPFluid Power (Sept. 30) F&J Fastening & Joining (Nov. 18)

- 4. Page Number
- 5. Number of pages in article or editorial item.

The classification system provides nine major (one-digit) classifications, each of which has up to nine (two-digit) sub-classifications. These, in turn, are divided into ten (three-digit) indexing classifications.

Indexing classifications ending in 0 (General) are used to index material concerning several or all indexing classifications ending in 1 through 8. Classifications ending in 9 (Other) are used for material falling within the sub-classification but not within any of the items 1 through 8.

3-MECHANICAL

11	Motors General	150	General Resistors, varistors, rheostats, poten-
111	Fractional (less than 1 hp)	131	tiometers
112	Ac integral horsepower, induction	152	Capacitors
113	Dc integral horsepower		Inductors
114	Universal (dc or ac)	154	Solid-state devices: Diodes, transistors,
115	Multispeed		thyristors, SCR's, rectifiers, semiconduc-
116	Gearmotor		tors, optical couplers, integrated circuits
117	Torque	155	Tubes, cathode ray tubes
118	Definite and special purpose, pancake	156	Saturable reactors, magnetic amplifiers
119	Other: Linear, motor protectors	157	Fuses, fuse panels, protectors
12	Power Supplies	158	Lasers, masers
	General	124	Other
	Batteries, battery chargers, battery holders	16	Connectors and Wiring
	Dc generators, motor-generators	160	General
	Ac generators, motor-generators, alter-	161	Rings, brushes, commutators, rotors
	nators	162	Terminals, binding posts, terminal boards
124	Converters, inverters	163	Contacts, button
125	Transformers, voltage regulators	164	Plugs, receptacles, connectors, sockets
126	Fuel cells, solar cells, photo cells	165	Wiring, cable, cord, harness, bus bars,
127	Thermoelectric supplies		coaxial, circuits, grounding
	Antennas	166	Printed circuits, stitched circuits

2-FLUID POWER

210	Fluids General Hydraulic fluids	256	Rotary actuators Winches Propellers (see 357)
212	Coolants, refrigerants Cleaners, solvents (see 577)	258	Centrifuges Other
214	Lubricants (see 576)		Seals General
216		261	Material seals (0-ring) Mechanical seals
218	Aerosols, pressurized liquids Other	263	Gaskets Wiper rings, piston rings
	Fluid Conditioners	265	Packings Labyrinths
221	General Fluid storage, pressure vessels, reservoirs	267	
223	Filters, strainers, screens, baffles Renovators (Note, 223 = 222 + 286 + 296)	269	Bellows, protective covers Other: Diaphragms, rolling diaphragms, clo- sures, plugs
224	Heat exchangers Coolers, radiators, heat pipes	27	Valves General
226	Heaters, burners	271	Directional control
228	Driers, evaporators Humidifiers, mixers, carburetors Other	272 273	Flow control, faucets, flow dividers Pressure control, relief vacuum breakers
	Fluid Conductors	274	Servo valves Valve blocks, manifolds
230	General Tubing (pressure) (see 587)	276	Nozzles, venturies, orifices, poppets
232	Hose, ducts, bellows	277 278	Proportional flow or pressure
233 234	Pipe Fittings		Other
235	Joints, couplings, unions, flanges, adapters		Instruments & Controls
236	Mufflers Hydrofoils	280	General
238			Test stands Control panels
239 24	Other: Applicators, dispensers, reversers Linear Devices	283	Meters, gages: Manameters, flow meters rotameters, anemometers
	General	284	Switches, liquid level
241	Cylinders, pistons, cylinder mounts Accumulators		Transducers (to hydraulic) Regulators
243	Intensifiers, boosters, rams	287	Fluid logic, fluidics, moving-part logic
244	Actuators, bellows, diaphragms	288	Other: Floats, anchors
	Pumps Motors		
247		29	Systems & Assemblies
248	Compensators	291	General Industrial hydraulic & pneumatic systems
	Other: Impellers, air guns	292	Mobile, aircraft, marine
250	Rotary Devices General	293	2 Mobile, aircraft, marine 3 Hydrodynamic drives 4 Hydrostatic drives 5 Vacuum
251	Pumps, rotary, centrifugal	29	5 Vacuum
252	Fluid motors, brakes, high-torque	290	5 Lubrication
252	low-speed	29	7 Hydraulic, pneumatic computers
	Air motors Compressors	29	B Power units 9 Other: Servo systems

03	ruckings
	Labyrinths
67	Bellows, protective covers
	Other: Diaphragms, rolling diaphragms, cla sures, plugs
7	Valves
70	General
	Directional control
72	Flow control, faucets, flow dividers
73	Pressure control, relief vacuus breakers
74	Servo valves
75	Valve blocks, manifolds
76	Nozzles, venturies, orifices, poppets
77	Proportional flow or pressure
78	
79	Other
	Instruments & Controls
8	Instruments & Controls
	General Controls
80	
80	General Test stands
80 81 82 83	General Test stands Control panels Meters, gages: Manometers, flow meter rotameters, anemometers
80 81 82 83	General Test stands Control panels Meters, gages: Manometers, flow meter rotameters, anemometers
80 81 82 83 84	General Test stands Control panels Meters, gages: Manameters, flow meter rotameters, anemometers Switches, liquid level
80 81 82 83 84 85	General Test stands Control panels Meters, gages: Manometers, flow meter rotameters, anemometers
80 81 82 83 84 85 86	General Test stands Control panels Meters, gages: Manometers, flow meter rotameters, anemometers Switches, liquid level Transducers (to hydraulic)
80 81 82 83 84 85 86	General Test stands Control panels Meters, agges: Manometers, flow meter rotameters, onemometers Switches, liquid level Transducers (to hydraulic) Regulators Fluid logic, fluidics, moving-part logic
80 81 82 83 84 85 86 87 88	General Test stands Control panels Meters, agges: Manometers, flow meter rotameters, onemometers Switches, liquid level Transducers (to hydraulic) Regulators Fluid logic, fluidics, moving-part logic

310	Power Sources General, energy	348	Other
311	Jet engines Internal combustion engines	35	Rotational Components General
314	Turbines, turbofans, turbojets Atomic, nuclear power Exotic fuel engines, rockets	351	Antifriction bearings: Ball, roller, needle, linear, thrust, pillow blocks
316	Fuels, propellants, explosives, coal, natural gas, hydrogen, fuel oil		Sleeve bearings: Gas, solid-lubricant, bush- ings, rod ends, ball joints Flexible couplings, universal joints, flexible
	Steam		shafts
	Geothermal, wind, water, solar, tidal Other	355	Torque converters, fluid couplings Shafts, axles, splines, crankshafts, spindles
	Constant-Speed Drives & Transmissions General: Speed reducers	356	Clutches, brakes, power absorbers, torque limiters
	Chain		Fans, blowers, propellers (see 257)
322	Belt		Reels, winches, hoists Other: Flywheels
323	Friction: Ball, disc, wheel, cone		
325	Gear	36	Mechanisms General
326			Cams, cam followers
327			Linkages, cranks
328 329	Other: Reversing	363	Intermittent-motion, periodic-motion, index ing, gyratory-motion, mechanical es
33	Adjustable-Speed Drives & Transmissions	364	capements, ratchets Three-dimensional
331	General: Speed reducers Chain Belt		Motion converters, leadscrews, jacks, actuators
	Friction: Ball, disc, wheel, cone	366	Spring motors
334	Gear		Telescoping members, collapsing members
335 336			Manipulators, vibrators, robots, separator Other
337		37	Controls
338			General
339	Other: Reversing		Push-pull
34	Drive Components		? Transducers (to mechanical) 3 Gyros, gyroscopes
	General	374	Mechanical counters
	Transmission chain, cable, cable fittings, cable splices, shackles	375	Safety devices, audible warning devices
	Belts, belting	377	
	Gears, gearing, racks, pinions Sprockets	378	
	Pulleys, sheaves, idlers, tensioners	3/9	Other

344 345 346	George, gearing, racks, pinions Sprockets Pulleys, sheaves, idlers, tensioners Conveyor chain, conveyor belts Conveyor screws, roller conveyors	39	Other Systems General
4	ASSEMBLY COMPONENTS		
411	Fasteners General Inserts Nuts, locknuts	427 428	Mechanical damping devices Spring-loaded devices Other: Belleville, constant force
414	Pins, dowels, staples Quick operating panel-type, latches Retaining rings, keys, collars, frictional shaft connectors, shaft-hub connectors, tolerance rings	431 432	Miscellaneous General Locks Nameplates, labels, wire markers, signs
417 418	Rivets, blind rivets Screws, bolts, studs, shear bolts Washers, grommets, eyelets, spacers, bush- ings, stand-offs Other: Spring clips, clamps, zippers, wire	434	Dials, knobs, handles, drawer pulls Shims Enclosures, housings, cabinets, cases Wheels, tires, rollers, casters, ball transfers, rings
42	ties, belt splicing, captive panel hardware, captive fasteners Springs and Isolation Devices General	438	Slides, ways Hinges, brackets Other: Razor blades, brushes, bells, knives, buzzers, chimes, bases, boots, bellows, way protectors
421 422 423 424		441 442	

51	Ferrous Metals		Reinforced, filled plastics
	General		Porous plastics
511	Cast iron, malleable iron, cast carbon, alloy		Colors for plastics
610	steels Wrought carbon, alloy steels	538	Plastic trims
	Free-machining steels		Other: Degradable
	Stainless steels, high alloys, high tempera-		
314	ture steels	54	Rubber and Elastomer
515	Specialty steels (tool, die, electrical)		General
516			Natural rubber
	High-strength low-alloys	542	Synthetic rubber Elastomeric plastics: Flexible silicones and
	Magnetic alloys	343	urethanes
214	Other	544	Hard rubber
52	Nonferrous Metals	545	
520	General	546	
	Aluminum	547	
	Copper, brass, bronze, beryllium copper	548	0.1
	Magnesium	549	Other
	Nickel	55	Joining Materials
	Titanium Zinc	550	General
	Refractory metals: Tungsten, tantalum,	551	Adhesives, sealants, encapsulants, coulk- ing, grout
520	molybdenum, columbium Precious metals		Welding rods
	Other: Tin, lead, chromium, vanadium		Brazing, soldering alloys
		554	
53	Plastics	555	
	General	556 557	
	Thermoplastic plastics (nylon, Teflon) Thermosetting plastics (epoxy, phenolic,	558	
332	filled silicones, rigid urethanes)		Other
533	Laminated plastics, vulcanized fiber	337	VIIIV.

-Materials (continued)

- Other Nonmetals General Carbon, graphite, diamonds
- 560 561 562 563 564 565 566 567 568
- Carbon, graphite, diamonds
 Glass, ceramics, quartz
 Refractory materials, mica
 Carbides, cermets
 Mineral and synthetic fibers, felt, fabrics
 Insulating materials (thermal, sound)
 Wood, cark, composition board, paper
 Chemicals, phosphors, inks
 Other: Abrosives, friction materials, synthetic crystals, heat-sensitive liquid crystals

57 Finishes, Coatings & Lubricants

- 57 Pinishes, country
 570 General
 571 Metallic coatings
 572 Chemical coatings, electrochemical coatings, photosensitive
 573 Organic finishes: Lacquers, synthetic enamels, points, varnishes

574 Porcelain enamels, vitreous coatings 575 Plastic coatings, plastic powders 576 Lubricating materials (see 214) 577 Cleaners, solvents (see 213) 578 Mechanical surface finishes 579 Other: Corrosion inhibitors

Prefabricated Forms

- General
 Film, tape, sheet, foil, plate
 Wire, wire cloth, knitted wire mesh, wire
 rope, cable rope, cable
 Patterned, perforated, expanded metals,
 textured, prefinished
- 584 Laminates
 585 Composite materials
 586 Structures: Honeycomb, foam, sandwich, isogrids, geodesic
 587 Structural shapes: Tubing, channels

6-MANUFACTURING PROCESSES

- 61 Metal Casting
 610 General
 611 Sond
 612 Shell mold
 613 Permanent mold, gravity, low-pressure 611 Sand 612 Shell mold 613 Permanent 614 Centrifugal 615 Investment

- 616 Die 617 Plaster mold 618 Continuous 619 Other

62

- Metal Shaping General 620
- 620 General
 621 Forging, cold forging
 622 Extrusion, impact extrusion
 623 Heading, upsetting, cold forming
 624 Thread, form rolling
 625 Powder metallurgy, porous metals, fiber

- 628 Hot isostatic pressing

629 Othe **Metal Forming**

- 630 631
- o.3U seneral
 631 Sheet forming, plate forming
 632 Stomping, drawing, blanking, embossing,
 coining
 633 High-velocity forming, explosive forming
 634 Spining
 635 Roll forming
 636 AG Use forming

636 637 638 639 Tube forming Wire forming Stretch and compression forming Other: Magnetic forming

- Other: Magnetic forming
 Metal Joining
 Other Seneral
 Arc welding
 Arc welding
 Arc welding
 Arc welding
 Arc welding
 Sesistance welding
 Plasma, electron
 beam, explosive bonding, ultrasonic,
 magnetic, solid state
 Selame cutting
 As Soldering, desoldering
 As Adhesive joining, bonding
 Other: Interlocking, keylock, dove-tail, sewing, bolted joints, riveting

- 65 Metal Removal
 650 General
 651 Planing, broaching
 652 Lothe turning, screw machining
 653 Milling, hobbing, gear shaping, sawing

- 654 Drilling, boring, tapping 655 Grinding, abrasive machining 656 Honing, lapping, polishing, burnishing 657 High-energy machining: Spark, laser, water
- 658 659 Other

66 660 661 Metal Treating General

- Surface treating Surface treating: Carburizing, nitriding Shot peening, surface working Chemical milling, etching, photochemical
- machining 665
- 666 667 668 669
- Other

- Finishing
 General
 General
 Wechanical, solvent cleaning
 Chemical, solvent cleaning
 Mechanical finishing, tumbling
 Conversion coating, anodizing, electro-
- 5/3 Conversion coating, anodizing, electro-polishing
 674 Electroplating, vacuum metallizing
 675 Metal spraying, flame spraying, hard fac-ing, plasma spray, plasma arc, electro-static
 676 Painting
 677 Hot stamping: Branding
 678

- 678 679 Other

- Plastics & Rubber Processes Prostrics of National Section (Notifing, injection molding, forging, rotational molding, forging, rotational molding Extrusion, pultrusion
 Sheet forming

- 685 Casting 686 Stamping, machining, fabricating, forming,
- forging
 Calendering, coating, plating
 Encapsulating
 Other: Filament winding, welding

Miscella General

- Assembly, automatic assembly, micro-assembly

692 Packaging, storage, shipping 693 Balancing rotating machines

7-Design Theory & Techniques (cont.)

Design Analysis & Synthesis

- General Mathematical methods, statistics Graphical techniques Analogs, models, simulators Computer techniques Reliability, quality control Dimensioning, tolerances

- Maintenance 758 Value analysis 759 Other

Basic Sciences & Fields General Physics

- **76** 760 761

- 761 rnysics 762 Chemistry 763 Thermal, thermodynamics, cryogenics, heat transfer, combustion 764 Radiation 765 Biosciences 766 Optics, photography, holography, photo-
- relasticity
 767 Ultrasonics
 768 Aerodynamics
 769 Other: Economics, metrology

- **Experimental Design**
- Prototypes, breadboards Testing, stress analysis
- 775 776 777
- Other

78 Environmental Design

- 780 General 781 Corrosion, rust 782 Mold, fungus 783 Outer space

- 784 Under sea 785 Pollution 786 Waste treatment, reclamation, salvage, restoration, conservation, recycling

852 Information classification, retrieval

Specifications, standards, metrication Report writing, articles, papers, oral Part numbering, part names (nomenclature)

- 788 High temperature, low temperature 789 Other

8-ENGINEERING MANAGEMENT & OPERATION

Engineering Department Operations

- General Structure, organization Costs, budgets
- Costs, budgets
 Programming, planning
 Personnel policies
 Recruiting, evaluation, training
 Managerial tolent
 Compensation, pensions
- 818 Communication 819 Other

New Product Development General

- 83 **Drafting & Reproduction**
- General Management, control systems Drafting practices, techniques Technical illustration
- Drafting equipment Reproduction equipment Furniture, drawing files
- 835 836 837

838 939 Other

- Laboratory & Testing General Nondestructive testing
- Dynamic analysis

Technical Information

- 851 Engineering libraries, files, books, museums
- Meetings, shows Contests, awards Societies Professional licensing, certification

856 Engineering records

858 Security, protection 859 Other

86 Patents & Patent Law 860 General

87 Personal & Professional Creativity, inventiveness

- Unions Education, curriculums, seminars, career planning Product litigation, expert witness Other: Women

Outside Services 88

- General Engineering design services Industrial design services
- 883 Consulting to government

9-MISCELLANEOUS

- **Complete Machines** 910 General 911 Ordnance: Tanks, missiles, rockets, ammu-
- nition (SIC 19)
 912 Machinery: Agricultural, construction, machine tools, office machines, materials handling (SIC 35)
- handling (SIC 35)
 913 Electrical machinery: Communication, radio, radar, TV, appliances, X-ray (SIC 36)
 914 Transportation: Automotive, aircraft, ships, railroad, spacecraft, undersea craft (SIC 37)
- watches (SIC 38)
 916 Fabricated metal products: Hand tools (SIC 34)

915 Instruments: Medical, dental, photographic,

917 Toys, playground equipment, sports equip-ment, recreational equipment 919 Other

99 Unclassified 990 General

7-DESIGN THEORY & TECHNIQUES

- Mechanics General Statics (at rest) Dynamics (force to create motion) Kinematics (motion in abstract) Vibration, natural frequency
- Shock
- 715 Snock 716 Noise, sound, music 717 Viscosity 718 Strain and stress 719 Other
- Strength of Material
- 72 720 721 722 723 724 725 726 727 General Elastic theory
- Plastic theory

728 Fracture 729 Other: Hardness

Fatigue, endurance
Creep
Impact stress
Thermal stress
Friction, wear

- Strength of Parts
- General Tension, compression Bending Shear, torsion
- 732 Shear, torsion
 734 Surface contact stress
 735 Plates
 736 Cylinders, columns
 737 Rotating discs, rotors
 738 Critical speed, critical flow
 739 Other
- /37 Uther

 74 Human-Factors Engineering
 740 General
 741 Styling
 742 Color
 743 Safety, comfort, protective clothing
 744 Illumination
 745 Human limitations
 746 Spare/replacement ports
 747
 748

- 748 749 Other: Tactile graphics
